

Charlie Easton

B. DONALDA, ALBERTA

LIVES & WORKS IN

EDMONTON

ABOUT

Charlie Easton is a Canadian contemporary painter whose expressive landscapes and abstracted natural forms explore the emotional atmosphere of the Canadian wilderness through colour, texture, and gesture. Working with an intuitive and deeply physical approach to paint, Easton creates compositions that balance movement and stillness, capturing fleeting impressions of land, weather, and memory with remarkable sensitivity.

Layered brushwork, rich surfaces, and energetic mark-making lend Easton's paintings a sense of rhythm and vitality, while subtle tonal shifts evoke the quiet drama of open skies, rolling terrain, and changing light. Rooted in both observation and abstraction, the artist's work moves beyond direct representation, instead offering emotional responses to landscape and the lived experience of place.

Easton's paintings possess a contemplative quality that invites viewers into immersive spaces of reflection and connection. Through dynamic compositions and an atmospheric use of colour, the artist celebrates the enduring relationship between nature, memory, and the expressive potential of paint itself.
